

SunRocket closed its virtual doors a while ago, and for those that still have their Innomedia devices:

Only for those who are ready to wipe out the config and use it for other VOIP providers:

1. Disconnect to WAN ( no internet).
2. Connect the gizmo via LAN to computer and login to it using user id  
<http://192.168.251.1/>  
id=user, pass=welcome
3. cut and past the following link and press enter to Restore factory default  
<http://192.168.251.1/restore2.ssi>
4. power cycle the gizmo and login to admin link with factory default password.  
[http://192.168.251.1/Voice\\_adminPage.htm](http://192.168.251.1/Voice_adminPage.htm)  
id=admin, pass=slapshot (for V3.0.77, V3.0.75)
5. Disable Provisioning  
Menu--IP Network ---Provisioning Setting

Remaining steps... see below pics.
